- Ideal for dry or slightly oily applications that require light mechanical protection and high levels of handling finesse.
- Well-suited to light assembly applications as well as to the needs of logistics and warehousing.
- The use of spandex elastics prevents risk of latex allergy, while the silicone-free glove reduces potential contamination of products.

Featured technology

#### Primary industries

- Automotive and transportation Metal fabrication
- Machinery and equipment
- · Oil, gas and chemical
- Building and construction
- Mining
- Agriculture and viticulture

Note: Not a chemical resistant glove.

#### Ideal applications

- Light assembly tasks
- Warehouse work
- · General handling

Risk Category II

Testing compliant to AS/NZS 2161 Anti-static according to EN1149

Use product only as specified. Products that provide 'cut resistance', 'cut protection', 'puncture resistance', 'puncture protection', 'abrasion resistance' or 'abrasion protection' do not completely prevent or eliminate the potential for cuts, punctures or abrasions, and are not intended or tested to provide protection against powered blades, serrated or other sharp or rotating equipment. Products that provide protection against sparks or flames are not 'fire-proof' and do not completely prevent or eliminate the potential for burns or associated injuries. Users are encouraged to always use caution and care when handling sharp or abrasive materials, chemicals, or other hazardous or dangerous substances. Any information or data provided is offered solely as a possible suggestion for use in making your own decisions or product choices. It is the responsibility of a product user to assess the level of risk and to determine the protective equipment required or appropriate for the user's particular purpose. Nothing in this brochure should be construed as a representation or warranty of merchantability or that any glove is fit for a particular purpose.
