Brilliant's LED Candle globes are designed for decorative lighting purposes, breathing new life to light globe designs long associated with incandescent globes. Keeping the elegant candle design using a glass crystal cover with a virtual filament lens design delivering an incandescent-like sparkling light effect. And incorporating a high-powered SMD array technology for superior output and energy saving up to 80% compared to traditional incandescent or halogen globes. Brilliant Candle LED globes last up to 15,000 hours, meaning you won't have to install another bulb for close to 10 years.[†]
