CEILING FANS IN YOUR HOME

Brilliant fan motors are "tropically rated" for our harsh Australian environment. They use high-grade copper windings, silicon-steel stators and sealed bearings for long and quiet life of operation. Showing virtually no motor movement and cool operational temperatures this proficient motor is guaranteed lasting operation.

Our blades are organised into sets based upon exact weight measurements to ensure smooth and quiet operation.

Brilliant Fans are covered by a 2 year warranty, with a further 3 years on a motor, giving you the best protection against any faults for your peace of mind.
