

Bootlace Pins - Ferrules

CABAC Bootlace Pins are used to terminate conductors, by containing the strands in a thin walled copper sleeve that is crimped onto the conductor. The sleeve ensures that no conductor strands stray, and also stops screws in the terminal from breaking strands. With the use of larger diameter flexible cables, the range is continually growing, so please contact our sales department if an item you need is not shown.

There are three basic types of BLP:

- Insulated single conductor style
- Twin conductor style
- Un-insulated cord end sleeves

The sleeves should be slipped over the stripped conductor, and crimped with one of our HNKE range of crimp tools. Crimp is only to hold sleeve on conductor until screw of terminal housing makes connection.
