Cleaning Guide:

Spraying cleaning products directly on to electrical switches or power points (sockets) is not recommended.

It is important to ensure that switches are turned off before cleaning.

Do not use any cleaning sprays - only wipe down with damp cloth or rub with dry cloth. (Do not use an abrasive cloth as it may scratch the plastic)

Do not use harsh chemical cleaners as these can break down the plastic and cause it to crack.

Do not wash the cover plates in water over 60°C.

Meerkat Range of Data Mechs

#Krone is a registered trademark of Krone G.m.b.H

STEP 1:
Strip off at least 1 inch of jacket from end of cable.

STEP 2:
Insert wires into IDC's according to the desired wiring configuration (T568B/T568A).
Terminate wires using punch down tool. Make sure the tool is set to trim excess wire as shown.
*Do not untwist the wire pairs until the punch down tool has trimmed them flush.

STEP 3:
Place termination cap on jack and press cap to make sure it is fully seated.

STEP 4:
Adjust the cable to a suitable position in the opening of the cap.
