# make the switch

premium wiring accessories

Rob Geddes

Erwin Van Handenhoven

## Make the switch to an International Design Mark

Thanks to the collaboration of international designer Erwin Van Handenhoven and luminary Rob Geddes, your home can be a showpiece of Australian International Design.

Hagerblu Visage range has changed the face of home decor and wiring accessory design forever. Now when you change your decor, you can change your switch covers, without changing the technology behind it. Brilliant.

## Home safe home

**We understand that the world is an exciting place for young minds. That's why at hager, we are particularly diligent about designing products that are not only beautiful to the eye but are also beautifully safe in young hands.**

Here are just some of the reasons why Hager switches and sockets are among the safest in the world:

---

**1**

### **CHILD SAFE SHUTTERS**

Rather than merely masking potential danger, this innovative shutter mechanism protects little fingers from the inside of the power point.

---

**2**

### **CHEMICAL RESISTANT PIVOT MECHANISMS**

Helps prevent power point switches degrading due to household chemicals.

---

**3**

### **ARC SHIELD**

Hagerblu's in-built arc shields reduce visible flash when switching fluorescent lighting

---

**4**

### **ROTOLOC®**

Eliminates the possibility of the switch rocker being pushed back into the wall cavity.

---

**5**

### **NO MORE POPS AND CRACKLES**

Hager's superior load bearing technology ensures all our standard switches will effortlessly handle a true 16AX fluorescent load capacity.

---

**6**

### **THINGS THAT GO BUMP IN THE NIGHT**

If you have ever tried to fit a plug into a socket that you can't see, you will appreciate this handy innovation: A clever 'dimple' indented at the earth point make a frustrating task a breeze.

---

# cyberart

## First-class quality, real-glass elegance

**To keep up with today's trends, you need to move ahead of them and embrace the technology of tomorrow.**

Create a modern look in your home or office – matching glass splashbacks to glass power points; flat screen TVs to flat panel glass switches. The classic and linear appeal of real glass has never been more achievable in so many places at once. It's cool to touch and cool to own.

Glass has entered the Australian design consciousness across a wide range of interior products. Now you can make luxury an art form with the premium finish of real glass surrounds. Designed and sourced in Europe, CYBERART draws from the leading trendsetters in style excellence – to give a truly unique finish that is limited only by your creativity.

## Shatter conventional perception

**Get a stylish and affordable look that's unmistakably modern and mistaken for glass.**

Glass fittings can transform a space from sleepy to sleek through their glossy finish and clean lines. Now, thanks to new technology, there's an affordable way to create a high quality glass finish that looks the part, while not actually being made from glass at all.

The secret of GLAZE is in its colour-matched surface glaze technology; the coating process gives off a reflective quality reminiscent of glass. It is made from a durable polycarbonate – easy to clean and ultra tough. From switches and sockets to TV and data points – nothing escapes our 'glaze' – all seamlessly blending with your existing real glass interiors.

## Steel the show

**Experience a seamless flow of metal, fitting perfectly both on your wall and in your lifestyle.**

If you desire the look of stainless steel appliances, brushed aluminium surfaces, and shiny fittings, this ultra-stylish range may just set off your metal detector. Now you can create your very own metallic statement without compromise.

For a lustre finish that's really worth lusting after, seek out the blemish-free quality of METAL MERCURY for your project. When plain white switches just won't do, the clean and sleek look of real metal adds a true dimension to your walls. With METAL MERCURY covers, you get the feel of real aluminium or stainless steel, with a manufacturing technique that ensures absolute precision fitting over any base product.

## The changing face of design

**If you're forever changing your décor but not your postcode, it's time to start accessorising the smart way.**

Trends change, colours change, even your own personal tastes change. Now you can move with the times without ever needing to physically move. Even right down at wall-switch level, you can give your home a complete makeover.

Meaning 'face' in French, VISAGE lives up to its name by allowing you to effortlessly clip on faceplates and colours to suit. Perhaps it's a softer bedroom décor whilst creating contrast in the kitchen – not only is it easy to change looks, it's expected!

With a heavy influence on interior fashion trends coming out of Europe, this range gives you the freedom to create truly 'off the wall' combinations.

## Add a 'finishing touch' to your decor

**Future-proof your home or office with the sleek, chic, and unique statement of low-maintenance metallic-look accessories.**

One of the biggest threats to high-traffic metal surfaces is their capacity for showing unsightly fingerprints – it contradicts their 'clean' look! Big leaps in surface coating technology have recently created appliances and interior surfaces that are easy to clean and leave no marks. Naturally, our consumers demand the same convenience when matching their wiring accessories.

There are not too many places that would attract as many fingerprints as the humble light switch. In creating the CYBER range, we acknowledged that maintaining a lifestyle shouldn't involve hours of cleaning. The resulting metallic finish gives a genuine lustre and sheen, which is resistant to fingerprints and marks.

## An award-winning, modern day classic

**When the space demands accessories that don't dominate,  
choose a timeless mix of classic and brand new.**

More and more people are choosing the timeless look in all things new, combining classic aesthetics with modern day benefits. Now you can enjoy a simple and stylish look that creates a soothing effect on its surroundings. Quietly boasting functionality and a beautifully understated form, you'll fall in love with today's take on yesteryear.

With its symmetrical feel and circular switches, PREMIERE has been made to measure – with different coloured surrounds which simply clip on to create your palette of choice. The natural feel and curves combine effortlessly with a modern set of colours for clean lines and lasting elegance.

# home automation

**"Our Tebis automation system allows me to draw the curtains, switch off the lights and turn on the movie – all with the touch of a button..."**

**How smart is that?"**

Smart technology deserves a very stylish face

## **Control your comfort**

Forget having to wait for a room to heat up or cool down before you can relax in comfort. Gone are the days of the air conditioning being left on when everyone has left for the day, or the kids leaving every light on in the house! A Tebis automation system can take the hassle out of everyday things – from appliances that are turned on when you want to use them - then off when you don't. Imagine taking back control of your home!

A Tebis automation system empowers you to manage your home, from comfort to efficient energy use, from entertainment to total security and peace of mind. You choose.

## Video Display Interfaces

### AT LAST - FINESSE INSTEAD OF MESS

Have you ever looked at the mess of cables, switches and plugs behind your home theatre equipment, and thought, "there has to be a better way". Well now there is, and it's not only better organised – it's smarter, better designed, better looking and safer.

---

### 'ANY COLOUR AS LONG AS IT'S WHITE' – NO MORE

One of the most exciting benefits of hagerblu's range, is the choice of different cover plates, colours and finishes. The design of your home is no longer limited to the colour of your walls. Enjoy the freedom of being able to truly complete the picture with hagerblu.

---

### GROUPED SWITCHES

De-clutter with a grouped outlet. The combinations are endless – choose the mix of power and connections that best suits you.

---

### COMPLETE NETWORK CONNECTION

If you have a large, high-end data installation, ask about our specialist Krone, shuttered and unshuttered data solution.

---

### MAKE THE CONNECTION WITH HAGERBLU

Whether connecting your home theatre components, your speakers, your amplifier, your Foxtel box, your digital ready TV or simply a phone line we have the mechanisms to do the job in either horizontal or vertical configurations. And with our patented, RotoLoc® switch mechanism, you'll never experience 'pushing your cable plug into the wall cavity' again.

---

### CLEAR, EASY SWITCH LABELLING

Why guess? Our labelling system, makes it easy to understand what switch operates what device. You even have the choice of text or icons or both. Simple.

---

*Available in all colours*

## Complete the picture

Explore our wide range of products to complete the set and exceed your project requirements.

### DIMMER SWITCHES

Save money and create soft ambience with a light dimmer. Learning from other designs, the control knob has been secured from the back so it can't be removed accidentally from the front of the plate.

48mm

47mm

53mm

47mm

### WIDE SOCKETS

At last, power points that can both be useful when one is loaded with a bulky power pack or battery charger. The solution is embarrassingly simple: greater spacing between the two sockets.

### MULTIGANG OPTIONS

In areas (such as near a TV) where there may be more than one type of point in close proximity, it makes sense to combine them together onto one multigang plate. Not only aesthetically more stylish, but also a more secure option.

### WATERPROOFING & PROTECTION

Specially designed IP66 rated switches are perfect for bathrooms and laundries, where contact with the switch from wet hands won't cause the water to reach the electricity. The polycarbonate switches are UV protected, making them suitable for outside, and the same wet-protection helps out in dusty environments such as workshops and garages.

### HOTEL/MOTEL OPTIONS

Key-card switches utilise micro switch technology to ensure the switch functions every time. Perfect for hotels, motels and hostels, as are our overload-protected shaver outlets.

### IDENTIFICATION LABELS

RotoLoc® ID windows provide clear circuit identification, while out front you'll find custom made software and stickers to identify risks or explain procedures. Logo mechanisms are available with both text and picture clearly visible – suitable for children, visually impaired, elderly and overseas visitors.

Available in all colours

## Not just a pretty faceplate

**Hagerblu products are underpinned by a world-class commitment to safety, innovation, and quality. When you purchase any of our products, you are buying the peace of mind gained through hours of research and road testing.**

One of the key components of our win in the 2006 Australian Design Awards was the Hagerblu *RotoLoc*® system.

A revelation to behind-the-scenes safety and end-user experience, RotoLoc® has transformed a once stagnant segment of the marketplace.

Like many great ideas, this one is simple. The switch mechanism is locked into place behind the plate in a method similar to a classic bayonet light bulb. The result is a switch that cannot push back – staying on your finger and not through the wall.

## **hagerblu** **EASYSPEC™**

**Hagerblu EASYSPEC is the fastest, simplest way to specify your project.**

EASYSPEC™ is a straightforward application that helps you specify your homes switching needs. A simple 5 step process and you have a list of components and their codes that you can send us to price. It's that easy.
