GLOVE CLIP

The glove clip is ideal for gripping your gloves, ear muffs, helmets, towels and just about anything else, reducing glove loss, injury and time by keeping them at hand.

To use, simply clip the small end to your trouser belt loop or directly to your clothing and clip the large end to your gloves.

The clip is designed to separate and break from each other in the event of the item being held, getting caught in machinery etc. The holding lugs will break in conjunction with the holding cord when a high force is applied on the glove clip.

The glove clip is available in a variety of colours.

Ordering Information
